- ■ **LinkedIn (↗)**
- ■ **HackerEarth (↗)**
- ■ **HackerRank (↗)**

Skills

- Python3
- Javascript(ES6)
- C++
- HTML5 | CSS3
- POSTGRESQL
- CLI | LINUX | GIT
- Competitive Programming(↗)

Projects

- ### E-commerce responsive website

  Link : *saurabh-ecommerce.herokoapp.com*

  Tech Stack : HTML5, CSS3

  GIT Repo Link : */saurabh-ecommerce*

  Collection of simple responsive ecommerce web pages built using HTML and CSS. It contains home, product, cart and checkout pages.

- ### Analytics on UN Population

  Tech Stack : Python3, Matplotlib

  GIT Repo Link : */un-population-analytics*

  Python module that converts raw csv data on UN Population to matplotlib bar charts which helps to portray visualised data and helps understand population trends of different regions.

- ### XMeme - Meme Sharing Platform

  Link -*xmemesaurav.herokuapp.com*

  Tech Stack : HTML, CSS, EXPRESS.JS, MongoDB

  GIT Repo : */X-Meme*

  It is a full-stack web application, it lets you post your favorite meme by just providing the name, caption, and URL of the image. Subsequently, it shows the latest 100 memes posted by all the different users on the same webpage.
